

AIDS Dementia & HIV Psychiatry Service (Adahps)

Created 17 May 2009 - 10:08am

Adahps (AIDS Dementia & HIV Psychiatry Service) is a state-wide service in NSW, Australia that assists in the care and management of people with HIV and complex needs.

Typically, clients may have a diagnosis of AIDS Dementia or a psychiatric illness complicating their HIV infection. Through various management strategies that include education and developing effective partnerships, our service can increase the quality of care that these clients receive.
